

In the figure, the structure of the “Catalog of the magnetic variations at the Panagjurishte station” is presented. The catalog consists of three basic sections: Magnetic field data, Data about MPB, and Catalog publications. The catalog contains information for the period 2007-2022 and will be updated every year. In each sub-folder with numerical or graphic data, a readme file is positioned, in which information about the details of the character and the presentation of the data in the respective sub-folder is given.
